- Stahlbau ki mar, a member of VVB sic Stahlbau Leipzig, has orders for steel poles (Stahlmaste) for an overland high-tension power line from Magdeburg to Perleberg. The order was whered by VaB Verbundnetz Editte of It is a 220 kV line, therefore energiewirtschaft Berlin. an overland line (Ueberlandsleitung) of 220,000 V. The two towers used for conducting the line across the blbe River (Elbkreuzungstuerme) are about 65 meters high with a total traverse width of 50 meters.
- Poles are likewise being built for the electrification of the Relis-Schleenhain line. The line is planned to be to be 20 kV, or 20,000 V.
- The management of Stahlbau Wismar has undergone some changes, Former Cormercial Director (fnu) Hellenbruch has been appointed plant manager, and (fnu) Kubisch has taken over the position of technical director; Hellenbruch was formerly with VVB Stahlbau Leipzig, Kubisch with a plant in Lagdeburg. Cause for the personnel shift was that former plant director Villi meber falsified plan fulfillments to the extent of 463 metric tons, or 220,000 DMA. The falsification was all the more serious since the 463 tons of material were destined for bisenhuettenkombinat Ost, and that firm has now brought the matter before the State Attorney.

Comment: Available reference material lists VEB Leipziger Stahlbau 25X1 VVB Abus.
